Why Planning?
The UC Irvine Master’s of Urban and Regional Planning program prepares students to play a significant role in creating a desirable future by confronting the complex physical and social challenges in our cities and regions. It is a professional program that is a gateway to opportunities in Planning and Planning-related practice including work in the private, public, and nonprofit sectors. Planners hold positions in all aspects of planning and development such as environmental sustainability, economic development, housing production and policy, land use and transportation planning, international development planning, and community organizing and development.
